## Education

### University of Edinburgh

BSc Computer Science

Expected May 2028

Edinburgh, Midlothian

#### Selected Modules:

- Introduction to Computation (96%), Object-Oriented Programming (82%), Linear Algebra (78%).

## Projects

### Data Science Research Paper - Impact of Digitisation of Edinburgh's Finance Sector | Python, Pandas, Matplotlib

- \* Engineered a spatial data pipeline using Geopandas and Shapely to map historical financial datasets (1986–2015), cleaning and filtering of 3,725 invalid records to isolate physical financial entities.
- \* Designed custom data analysis visualisations, creating choropleth maps, regional stacked bar charts, and regression plots to effectively communicate complex temporal and regional contraction patterns.
- \* Executed piecewise linear regression to discover an almost 3x increase in contraction rate post-2000, statistically reinforcing the idea that the Dot-Com crash as the critical turning point toward digital banking.

### TutrSpace - A Full-Stack Tutoring Platform | Python, React.js, CSS, Django, MySQL

- \* Developed the landing page front-end using React and Tailwind CSS, focusing on responsive design and user experience.
- \* Iteratively improved call-to-action flow by gathering feedback from current tutors and student users, enhancing usability and engagement by interviewing clientele.
- \* Implemented initial UI/UX mockups and designed component structure for future full-stack development with Django backend and MySQL database.
- \* Platform aims to enable students to browse verified tutors, book sessions, and pay for services.

### Adahack Hackathon - Budgeting Website | React.js, Tailwind, Javascript

- \* Collaborated in a team of 4 to design and build a full-stack budgeting web application for users struggling with personal finances, featuring interactive graphs.
- \* Developed secure back-end user authentication using JavaScript, integrated with React front-end and Tailwind CSS for styling.
- \* Completed the project in 12 hours, demonstrating rapid problem-solving, teamwork, and technical execution.

## Experience

### University of Edinburgh

Informatics Academic Parent (Peer Mentor)

October 2025 – May 2026

Edinburgh, Midlothian

- \* Volunteered as an academic parent to provide academic guidance to a group of 20 Year 1 undergraduates.
- \* Offered services as a mentor for year 1 classes, such as INF1A (Introduction to Computation and INF1B (Object-Oriented Programming).

### Halfords

Part-Time Sales Assistant

May 2025 – September 2025

Swadlincote, Derbyshire

- \* Diagnosed and resolved mechanical faults while assembling and repairing bicycles, applying a structured approach to problem solving in fast-paced environments.
- \* Combined customer interaction with commercial awareness, communicating clearly, prioritising effectively, and supporting broader team and organisational goals.

## Technical Skills

**Languages:** Python, Java, JavaScript, HTML, CSS, SQL

**Technologies:** Matplotlib, Pandas, React.js, Tailwind, Django, MySQL

**Concepts:** Component-based architecture, Responsive design, User authentication & authorisation, Relational database design, Iterative UI/UX improvement, Full-stack project structure, deployment planning, Version Control
